<u>**Career Objective:**</u>

To obtain a long-term career with an organization, which has a strong background & challenging environment that encourages continuous learning & creativity & that provides good opportunity & utilize my talent & potential to meet the goals of the organization & for enhancement of professional and personal status.

<u>**Work Experience:**</u>

- Working as Software Developer at Wipro from January 2018 to 2022 april 12
- Working as Software Developer at virtusa from April 2022 to 2022 october 28

<u>**Academic Qualification:**</u>

- Master of Business Applications from JNTU, Ananthapur, Andhra Pradesh.
- Bachelor of Science from Srikrishna Devaraya University, Anantpur, Andhra Pradesh.

<u>**Professional Skills Summary:**</u>

- 4 years of extensive IT experience which includes the experience in developing User Interface (UI) applications and professional web applications.
- Experience in design and development of web-based applications using Java, JDBC, SQL, Java-API and Spring.
- Expertise on Core Java Technologies like Multithreading, Collections and Exception handling mechanisms.
- Proficient knowledge of a server-side programming language.
- Experience in developing Microservices using Spring-Boot.
- Worked On Spring Security Authentication, Authorization
- Developed the functionalities using Agile Scrum Methodology
- Basic Understanding of the concepts of MVC (Model-View-Controller) Pattern, JDBC (Java Database Connectivity), and RESTful web services.
- Strong debugging and troubleshooting skills
- Skill for writing reusable Java libraries
- Experience with databases like Oracle
- Proficient understanding of code versioning tools, such as Git .

- Ability to adapt quickly to new environments and technologies.
- Experience in SDLC (Software Development Life Cycle) that includes Requirements Analysis, Design, Coding, Testing, Implementation, Maintenance with methodologies like Waterfall Model and Agile Methodology
- Having hands on experience on HTML 5, CSS3, Java, Angular.
- Experience in working with **Angular**
- Hands on Experience on **Angular CLI** (Command line Interface).
- Experience with various **IDE's** such as **Visual Studio** and **Notepad++**.
- Good understanding in Responsive Web Design.
- Proven software development experience and Web application development skills.
- Ability to write clean, readable Java code
- Creating REST API in Spring boot

Technical Skills:

Web Technologies	: HTML, CSS, Angular
Version Control	: GIT
MS-Office Packages	: MS-Word, MS-Excel, MS-Power point
Programming Languages	: Java, Spring boot
Operating systems	: Windows
IDE Tools	: Eclipse, IntellIJ, NetBeans, Maven
Webserver	: Apache tomcat , HTTP

Projects Handled: project duration from 2018 jan to2019 jan
Project # 1
Client   **:** Verizon Wireless, NJ

Roles and Responsibilities:

- Responsible to collect the UI requirements for the project.
- Used UI Router for implementing routing in the application**.**
- Have an overview, understanding about different features of Angular like   dependency injection and two-way data binding**.**
- Used Http services & pagination.
- Involved in development, design and implementation of front end part of the application.
- Responsible for creating the look and feel of the public website.
-

Project # 2 project duration from 2019 jan to2021 jan
Client   : Kellogg's E-commerce

Roles and Responsibilities:

- Designing and developing User Interface using HTML, CSS, JavaScript.
- Design, develop, implement, and maintain java application phases, code, and software.
- Testing and evaluating new programs. Identifying areas for modification in existing programs and subsequently developing these modifications. Writing and implementing efficient code.
- Understanding the technical and functional specifications.
- Used Responsive Web Design templates to meet cutting-edge technology requirements.
- Worked on Troubleshooting of reported problems
- Integrated front-end application with the application business layer.
- Followed best practices and standards for accessibility and cross-browser compatibility.
- Collect feedback from design and technical staff on Website development needs.
- Stick to established coding standards and group procedures individually and in teams.
- Guide and maintain developer teams and best practices.

Project # 3 project duration from 2021jan to2022 april
Client   **:** Craft Foods

Roles and Responsibilities:

- Developed web pages for smart phones, tablets and personal desktops using HTML5, CSS3, Bootstrap, jQuery, Angular 8, Typescript and JavaScript.
- Using Angular 8 with Typescript combination to create Single page application.
- Using HTML5 to create static web pages and SCSS (CSS pre-processor) for styling purpose.
- Using Bootstrap 3 framework to work our application in all devices including Mobiles, Tablets and Desktops.
- Created multiple angular components to keep our application more modular.
- Experience in creating services to share information between components throughout the application which helps us in reducing the amount of duplicate code that we create.
- Experience in working with Angular built-in directives such as ngIf, ngFor, NgClass, NgStyle and Ng Switch etc.
- Created custom directives which give specific behavior to HTML element.
- Created in creating custom pipes to transform the data for displaying purpose.
- Good understanding routing in Angular2.0, how to pass parameters to routes, nested routes and route guards.
- Experience in using web pack module loader for bundling, minifying the code.
- Good understanding of event emitters to communicate between components.

- Experience in updating from Angular 2 to Angular 4 and implemented Angular 4 features in existing application.
- Good understanding of Inter-component communication using '@Input and @Output' decorators.
- Hands on experience in working with GIT version control and source code maintenance.
- Participated in all team meetings and daily scrum calls with my team.
- Worked closely with project lead for reviewing project goals and creating proposals for future enhancements and researching their fields for UI design.
- Used Sublime text 3 for designing, coding and developing our application.

- Good knowledge in building cross browser compatibility applications using HTML5 and CSS3.
